revolutionary... versatile

"365"

A NEW LOW-COST IDEA IN TRANSPORTATION THAT CAN PERFORM
DOZENS OF JOBS EASIER AND FASTER THAN EVER BEFORE!

The Gibson "365" is fast becoming known as the car of a thousand uses. For the jobs it can perform... both at work or play... are almost limitless!

Used as a "runabout," the Gibson "365" can save man-hours and money carrying executives, maintenance men, supervisors and janitors around factories, airports, estates, parks, cemeteries. Or, by attaching the Gibson Pallet Lift Truck or Trailer Cart, the unit is handy for hauling parts and picking up paper. Add to this the maintenance jobs of mowing grass, picking up leaves, removing snow and you begin to see the potential for this powerful little "365"—all at a tremendous saving in cost over the larger, more expensive units being used to do many of the same jobs.

The Gibson "365" is ruggedly constructed and expertly engineered for dependable, long-lasting performance. Optional extras include an electric starter and automatic transmission, which makes driving so easy and effortless even children can use it.
TOWN • COUNTRY SHOP • FACTORY AND GENERAL UTILITY

The Gibson "365" USES...365 DAYS!

MOWING • LEAF REMOVAL • GRASS PICK-UP • SNOW REMOVAL • PERSONNEL CARRIER • TOW TRACTOR FOR INDUSTRIAL USE AND 100 OTHER USES!
