Small, powerful, and versatile, the great new Jaques Mighty Mite, with its matchless family of work attachments, offers the greatest improvement of this decade in light-draft mobile power. On farms and ranches, in industry and other fields, it performs operations by the score with tireless endurance. The Mighty Mite opens a new era in low-cost traction, take-off, and belt power. For all jobs on the small farm, orchard, or garden, and for innumerable supplementary power needs on larger places, the Mighty Mite works and pays and saves.

Preparing, planting, cultivating the big, important jobs you don't have time to do every month. There's plenty for it to do every month day and night. Its extremely low gas consumption makes economical and on-the-farm production all the more profitable, easier farming era. Handy for even a small boy to operate and prove every part of the tractor and equipment whole year against defective make-your-old-engine, plus $50, for a new Jaques dealer. The Mighty Mites

UNLIMITED Adaptability

Digging, harvesting, hauling — these are things your Mighty Mite does to pay for itself. It's a willing worker, always ready for gasoline and oil consumption calls for users to keep it going. With its modern design and trouble-free motor, it's the most adaptable piece of farm equipment available. Not only is it strong and durable, but it's also easy to maintain.

Your Mighty Mite is so versatile it will do any job a span of mules can do and will work faster and cheaper. Over all kinds of ground and in all kinds of weather, it performs an endless number of tasks. It operates farm implements, power saws, post hole diggers, and many other attachments. It tows wagons and trailers. It builds and maintains roads, parks, and lawns. Tough, long-wearing rubber tires take you over highways and streets as readily as over rocky hills and soft fields. With such unlimited adaptability, the Mighty Mite is one of today's most profitable investments.
WHEREVER VERSATILE POWER IS NEEDED—HITCH ON TO THE

Mighty Mite

Other Uses

Besides farm cropping operations, the Jaques Mighty Mite superbly performs many other tasks in town or country. Here are some of the operations it is most frequently used for:

• Hauling crops and livestock to market.
• Hauling feed to feedlots.
• Moving cotton wagons in the fields.
• Clearing brush and timber lands.
• Felling trees and cutting logs and cordwood.
• Grading fire barriers for pastures, fields, and buildings.
• Building and maintaining private roads and driveways.
• Leveling building sites, lawns, and playgrounds.
• General utility around construction jobs.
• Varied utility for street and highway construction and maintenance.
• Pulling lawn mowers in parks, golf courses, cemeteries, clubs, and estates.
• Mowing weeds in pastures, rights-of-way, and playgrounds.
• Airport towing and hauling.
• Towing in factories, warehouses, loading docks, and wharves.

Specifications

B. Clutch: 4-1/2 inch, twin-disc type.

C. Transmission: Three speeds forward, from 2-1/2 to 10 miles per hour. One reverse speed, from 1-1/2 to 2-1/2 miles per hour.

D. Differential: Spiral bevel, ring gear and pinion type.

E. Final Drive: 6:1 ratio, bull gear and pinion type, completely enclosed in gear case.

F. Brakes: Individual brake drums on each rear wheel.

G. Tires and Wheels: Disc-type wheels. Front tires: 4:00x12, implement type (multi-ring).

Rear tires: 7:50x16, implement type, ground-grip tread (chevron).

H. Power Take-Off: Two-groove, B-type pulley.

J. Performance: The following are the draw-bar pulls as computed by formulas approved by the University of Nebraska Farm Implement Experiment Station and in accordance with rules accepted by the Society of Automotive Engineers (SAE):

- 655 lbs. draw-bar pulls at 3000 RPM in low
- 369 lbs. draw-bar pulls at 3000 RPM in second
- 217 lbs. draw-bar pulls at 3000 RPM in high
- 715 lbs. draw-bar pulls at 2200 RPM in low
