The series N Tractors come in 2½, 5, and 8 H. P. These tractors are very rugged throughout. They have Timken tapered and Hyatt roller bearings on rear axles and differentials same as Ford V8, and also Timken tapered roller bearings in front wheels. Are built to take the place of good horses or mules, and will do the work for many years with low fuel consumption.

The 1954 Models N5 and N8 SHAW DU-ALL Riding Tractors have 8:00 x 16" rear and 3:00 x 12" front tires, 26" tread, and 56" wheel base. Are approximately 81" over-all in length, 34" over-all in width, 42" over-all in height, and weigh 670 lbs. with hood. These tractors are of rugged construction to stand years of service. Are equipped with automotive type transmission giving three forward speeds and a reverse. Transmission and differential gearing are re-made Ford V8 parts carefully inspected, and all questionable parts replaced before assembling. Takes our regular one year guarantee but will last many years. Speed of tractor range is from 3/4 to 7 miles per hour. Equipped with individual brakes to aid short turns.

1. Model N5 SHAW DU-ALL 5 H. P. Riding Tractor does a good job of plowing in dry hard black soil with 10" No. PN10 Plow and No. CN12 Coulter.

3. Model N5 SHAW DU-ALL 5 H. P. Riding Tractor pulling grain drill between 40" corn rows. This tractor has a tread of 26", thus permitting it to run between corn rows. Special width treads can be made to order, either wider or narrower.

All three models equipped with Briggs and Stratton air-cooled engines.

4. Model N5 SHAW DU-ALL Riding Tractor with grain drill. We do not offer the grain drills, illustrated in photos 3 and 4, however we can furnish a universal hitch.

5. Model N5 SHAW DU-ALL Riding Tractor pulling gang of three 22" lawn mowers. Also supplied with three 18" or three 20" mowers.

6. Model N5 SHAW DU-ALL 5 H. P. Riding Tractor pulling trailer load of water. This Model N5 or the Model N8 (8 H. P.) Tractor is handy for many heavy duty jobs.
